DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 3, 2005 has been entered.

2. Claims 1-36 are pending in the application.

Claim Objections

3. Claim 1 is objected to because of the following informalities: The claim limitation "exporting the system object model database of the network to the separate, non-integrated network vulnerability/risk analysis programs" is repeated two times. Appropriate correction is required.

Response to Arguments

4. Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Applicant's arguments, see pages Arguments pages 12-16, with respect to currently amended claims, 1-36 have been fully considered and are persuasive. The closest prior art, Ronnen (U.S. Patent No. 5,699,403), does not disclose using exporting the system object model database to the "separate, non-integrated network vulnerability/risk analysis program, wherein each analysis program is operative to run as a separate program and produce an initial data source separate from any data sources produced by respective other programs." The CPA teaches "risk computation modules" (column 7 lines 19-22), which calculate risk data. However, these modules are integrated and do not run as separate programs producing results independent of the other programs. Therefore, the prior art of record does not teach the subject matter of the pending claims. However, the claims are still subject to rejections under the nonstatutory obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,883,101 as described below.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2131

F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-36 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,883,101.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims 1-36 of the instant application are envisioned by claims 1-27 in that claims 1-27 of the patent contains all the limitations present in claims 1-36 of the instant application. Claims 1-36 of the instant application therefore are not patentably distinct from the earlier patent claim and as such are unpatentable for obvious-type double patenting.
